ABOUT ME

I am a Full Stack Developer with 6 months of experience in building scalable SaaS platforms and cloud applications. I specialize in technologies such as Python, Flask, and AWS, with a solid track record of significantly improving system performance and efficiency. I have a passion for integrating AI/ML components into applications and ensuring secure user authentication.

EDUCATION

Degree	Institute	Year	Result
Bachelor of Engineering (Electronics & Communication Engineering)	University Institute of Technology, The University of Burdwan — Burdwan, West Bengal	2021 – 2025	CGPA: 7.3
Higher Secondary Education (W.B.C.H.S.E)	Anantapur Siddheshwari High School — Howrah, West Bengal	2018 – 2020	Percentage: 80%

WORK EXPERIENCE

Full Stack Developer Intern | Cloudifyapps | 09/2025-03/2026

- Developed cloud-based SaaS applications using Flask and PostgreSQL.
- Built secure authentication systems and RESTful APIs for scalable backend services.
- Improved backend performance and optimized database query efficiency.

Software Developer Intern | Ericsson | 06/2024-07/2024

- Learned API integration, backend architecture, and real-world enterprise workflows.
- Worked with FastAPI, PostgreSQL, Docker, and AI chatbot development using OpenAI APIs.
- Received a part-time API Developer opportunity from a mentor based on learning ability.

SKILLS

Software Development: Python, Flask, FastAPI, RESTful APIs, HTML, CSS, SQLAlchemy, API Integration, Clean Architecture

Database & Cloud: MySQL, PostgreSQL, Docker, AWS Cloud Foundations, DigitalOcean, Query Optimization, Deployment Fundamentals

AI & Tools: OpenAI API, Prompt Engineering, CrewAI, Git, GitHub, Postman, Figma, Canva

Core ECE & Professional Skills: Communication Systems, Embedded Systems Basics, Networking Fundamentals, Problem Solving, Team Collaboration, Technical Communication, Project Coordination

PROJECTS

Project	Tech Stack	Description
SaaS Admin Panel	FastAPI, PostgreSQL, OAuth 2.0	1. Developed a SaaS admin

		panel with secure authentication and backend management. 2. Integrated Google OAuth 2.0 and database-driven user management systems. 3. Improved backend performance and optimized application reliability.
eCommerce System with Admin Panel	Flask, Python, MySQL, SQLAlchemy, Docker	1. Developed a SaaS admin panel with secure authentication and backend management. 2. Integrated Google OAuth 2.0 and database-driven user management systems. 3. Improved backend performance and optimized application reliability.
AI-Based Personalized Movie Recommendation System	Python, CrewAI, OpenAI API, TMDB API	1. Built an AI-powered movie recommendation system based on user preferences. 2. Integrated TMDB API for movie filtering, ratings, and genre-based suggestions. 3. Used AI models for intelligent recommendations with human-like explanations.

TRAINING & TECHNICAL EXPOSURE

- Electronics for Unmanned Aerial Systems, Sensors & Communication
- Jointly Organized by **IIT (ISM) Dhanbad** and **Ministry of Electronics & Information Technology (MeitY), Government of India** | May 2023
- Participated in a technical bootcamp on UAS, sensors, and communication systems.
- Learned basics of embedded electronics, wireless communication, and sensor integration.
- Gained practical exposure to drone technology and electronic communication systems.

LANGUAGES

- Bengali — Native Proficiency
- English — Professional Proficiency
- Hindi — Working Proficiency
